<b>1.0 INTRODUCTION .....</b>	<b>1</b>
<b>1.1 Purpose of the Plan .....</b>	<b>1</b>
<b>1.2 Geographic Scope.....</b>	<b>1</b>
<b>1.3 Structure of the Plan.....</b>	<b>1</b>
<b>1.4 Consultation .....</b>	<b>2</b>
<b>1.5 Legislative and Policy Framework .....</b>	<b>3</b>
1.5.1 The Resource Management Act 1991 .....	4
1.5.1.1 Purpose and Principles of the Resource Management Act .....	4
1.5.1.2 Restrictions under the Act .....	4
1.5.1.3 Prior to the Resource Management Act 1991 .....	5
<b>1.6 Relationship of the plan to other Plans and Legislation .....</b>	<b>5</b>
1.6.1 The Regional Policy Statement.....	5
1.6.2 The Part-operative Regional Plan for discharges to Land and Water, Waste Management and Hazardous Substances .....	5
1.6.3 Proposed Regional Coastal Environment Plan for the Gisborne Region.....	6
1.6.4 Part-Operative Combined Regional Land and District Plan for the Gisborne Region ...	6
1.6.5 Other legislation .....	6
<b>1.7 Integrated Management of Natural and Physical Resources .....</b>	<b>7</b>
<hr/>	
<b>2.0 AIR QUALITY MANAGEMENT ISSUES IN THE GISBORNE DISTRICT .....</b>	<b>1</b>
<b>2.1 Introduction to Issues.....</b>	<b>1</b>
<b>2.2 Tangata Whenua Issues .....</b>	<b>1</b>
2.2.1 Discharges of odorous or visual contaminants have the potential to cause adverse effects on sites and resources of significance to tangata whenua .....	1
2.2.2 The air is a taonga and needs to be safeguarded.....	1
2.2.3 Discharges of contaminants to air, particularly hazardous pollutants and particulate matter, have the potential to cause adverse effects to the health of the tangata whenua of the Gisborne region .....	2
<b>2.3 Ambient Air Issues .....</b>	<b>2</b>
2.3.1 Discharges to air cause, or have the potential to cause, reduction in the quality of ambient air.....	2
2.3.2 There is a lack of adequate data and information on ambient air quality, contaminants in discharges and climatic effects in the Gisborne region .....	3
<b>2.4 General Air Quality Management Issues .....</b>	<b>5</b>
Hazardous Air Contaminants.....	5
2.4.1 Hazardous air contaminants have the potential to cause serious and significant adverse effects on human, flora and fauna health and ecosystem integrity .....	5
Odour.....	6
2.4.2 Odorous discharges to air can result in temporary or prolonged adverse effects on human health and wellbeing, amenity values and the natural character of the coastal environment, wetlands, rivers, lakes and their margins .....	6

---

Smoke, Dust and Other Particulate matter.....	7
2.4.3 Discharges of smoke, dust and other particulate into the air have the potential to cause adverse effects on human health and on amenity values in localised areas of the region .....	7
Sensitive Areas.....	10
2.4.4 Discharges to air have the potential to cause adverse effects on receiving environments within the Gisborne region that are potentially sensitive to those discharges.....	10
<b>2.5 Spray Application of Agrichemicals.....</b>	<b>11</b>
2.5.1 Discharges to air from the application of agrichemicals, particularly when resulting in off target spray drift, have the potential to cause adverse effects on human health, flora and fauna health, ecosystem integrity and on sensitive receiving environments in the region.....	11
<b>2.6 Discharge of Contaminants from Transport Sources.....</b>	<b>13</b>
2.6.1 Engine emissions can result in adverse effects on human health flora and fauna health and ecosystem integrity and are a major contributor to global warming.....	13
<b>2.7 Discharge of Contaminants from Domestic Sources.....</b>	<b>15</b>
2.7.1 Discharges to air from domestic sources, including home heating appliances, open fires and backyard burning, can adversely affect human health and reduce amenity of adjoining properties and present a health risk .....	15
<b>2.8 Industrial or Trade Sources.....</b>	<b>17</b>
2.8.1 Discharges of contaminants to air from industrial or trade premises can reduce amenity and adversely affect human health and flora and fauna .....	17
<b>2.9 Global Issues.....</b>	<b>18</b>
2.9.1 Discharges of certain contaminants to air in the Gisborne region have the potential to contribute to the greenhouse effect and ozone depletion.....	18
The Greenhouse Effect .....	18
Ozone Depletion.....	20

---

<b>3.0 OBJECTIVES FOR AIR QUALITY MANAGEMENT .....</b>	<b>1</b>
<b>3.1 Introduction .....</b>	<b>1</b>
<b>3.2 Objectives .....</b>	<b>1</b>
3.2.1 The maintenance or, where appropriate, enhancement of ambient air quality in the Gisborne region.....	1
3.2.2 That human health, amenity values, flora and fauna and other natural and physical resources and the life supporting capacity of air are not adversely affected by the discharge of contaminants to air.....	1
3.2.3 To enable use, development and protection activities involving discharges to air that provide for the social, economic and cultural wellbeing of the region while avoiding, remedying and mitigating adverse effects on the region air resource and other receiving environments .....	2
3.2.4 The recognition of and provision for the relationship of tangata whenua with the air resource.....	2

---

<b>4.0 POLICIES FOR AIR QUALITY MANAGEMENT .....</b>	<b>1</b>
<b>4.1 Introduction .....</b>	<b>1</b>
<b>4.2 Policies for Tangata Whenua .....</b>	<b>1</b>
4.2.1 to acknowledge the relationship tangata whenua have with the air resource, primarily through enabling the active participation in their management of the resource .....	1
<b>4.3 Policies for the Management of Ambient Air Quality .....</b>	<b>1</b>
4.3.1 The ambient air quality of the Gisborne region should be maintained within 66% of the ambient air quality guidelines in table 1, appendix 1 .....	1
4.3.2 Actively seek to improve information and knowledge available regarding air quality and its management .....	2
<b>4.4 General Policies for Controlling Discharges of Contaminants to Air .....</b>	<b>2</b>
4.4.1 A cautious approach shall be taken when there is scientific uncertainty as to the effects a contaminant discharged to air has on the environment and where the discharge has the potential to result in serious or irreversible harm to the environment .....	2
4.4.2 Adverse effects from the discharge of hazardous air contaminants should be avoided as far as practicable. If complete avoidance is not practicable, adverse effects should be mitigated in preference to remediation. Preference should be given to: .....	3
4.4.3 The discharge of odorous contaminants should not result in offensive or objectionable effects on amenity values and human health and wellbeing .....	3
4.4.4 Discharge of smoke, dust and other particulate matter should not occur at a volume, concentration, rate or in a manner that results in: .....	4
4.4.5 To recognise that some receiving environments in the Gisborne region are more sensitive to the discharge of contaminants to air than others. Consideration shall be given to the potential effects of the discharge of contaminants on: .....	4
4.4.6 To ensure that the potential adverse effects on alternative receiving environments (e.g. Water or soil) are taken into account when managing discharges of contaminants to air .....	5
4.4.7 To recognise that there is the potential for prevailing weather conditions, topography and other environmental conditions to influence the potential for adverse effects of the discharge of contaminants to air on the environment .....	6
4.4.8 To encourage the use of land use planning mechanisms and other land management techniques, including the separation of incompatible activities, to acknowledge issues of sensitivity or reverse sensitivity to mitigate adverse effects on the environment from the discharge of contaminants to air .....	6
4.4.9 To require, where appropriate, the adoption of the best practicable option to avoid, remedy or mitigate adverse effects on the environment where there is insufficient information on the volume, concentration, rate and manner of the discharge and its actual or potential effects on the environment and ambient air quality .....	6
4.4.10 When determining the appropriate height for discharge stacks, regard shall be given to appendix 2 calculations of chimney heights .....	7
4.4.11 In addition to general policies 4.4.1 to 4.4.8, the following matters shall be given considered when assessing applications for resource consent: .....	7

<b>4.5 Policies for Specific Sources of Discharges.....</b>	<b>8</b>
4.5.1 To take into account that there is the potential for the discharge of contaminants from fuel burning equipment to cause adverse effects on the environment, in particular when:.....	8
4.5.2 To take into account that there is the potential for adverse effects on the environment to occur from the discharge of contaminants from abrasive blasting and, in particular, the health of surrounding residents, flora and fauna and surface water when:.....	8
4.5.3 To avoid, remedy or mitigate the adverse effects on neighbouring properties from discharges to air resulting from the use of domestic heating appliances, backyard incinerators and open burning by:.....	9
4.5.4 To ensure the discharge of contaminants from motor vehicles does not cause adverse effects on human health, amenity values, ecosystem integrity and localised and ambient air quality.....	9
4.5.5 To ensure road pavement burning is not undertaken in locations and conditions where it has the potential to cause adverse effects on the health of surrounding residents, amenity values or surface water.....	10
4.5.6 Manage adverse effects from the spraying of agrichemicals, on the sensitive areas in policy 4.4.5 by ensuring that the occurrence of agrichemical spray drift beyond the target property or on other non-target sensitive areas or species within the property boundary is avoided or minimised where avoidance is not practicable. Regard to the following will be had when considering applications for resource consent to discharge agrichemicals to air:.....	10
4.5.7 To promote and encourage the safe and responsible use of agrichemicals that avoids or mitigates adverse effects of off-target spraydrift on the environment.....	11
4.5.8 The discharge of greenhouse gases and ozone depleting substances should be undertaken in a manner consistent with national policies and guidelines.....	11

<b>5.0 METHODS OF IMPLEMENTATION .....</b>	<b>1</b>
<b>5.1 Introduction .....</b>	<b>1</b>
<b>5.2 Monitoring and Research .....</b>	<b>1</b>
Ambient Air Quality .....	1
5.2.1 Adopt the ambient air quality guidelines (1994) (Appendix 1) as the principal guidelines for assessing and measuring ambient air quality in the Gisborne region.....	1
5.2.2 Monitor and gather information on the ambient air quality of the Gisborne region. the following ambient air quality indicators will be given priority when monitoring:.....	1
5.2.3 Undertake a review of air quality monitoring needs within 4 years of this plan becoming operative that:.....	1
5.2.4 Provide for input from tangata whenua into monitoring programmes and research initiatives relating to the management of air quality in the Gisborne region by:.....	2
Discharges.....	3
5.2.5 Where appropriate, to require those undertaking the discharge of contaminants to air to keep records about the nature and timing of discharges for:.....	3
5.2.5.1 To require that, where appropriate, dispersion models are used to assess the potential effects of discharges to air.....	3
5.2.5.2 Assessment of odour will be undertaken in accordance with the following:.....	3

5.2.5.3	Where appropriate the council will use the workplace exposure standards in the assessment of noxious and dangerous levels of contaminants. In assessing noxious or dangerous levels in terms of human health concerns, the concentration of any contaminant specified in the workplace exposure standards (occupational safety and health service, 1994) should not exceed 1/30th of the time weighted average standard on the adjacent property or public land.....	4
<b>5.3</b>	<b>Advocacy and Education .....</b>	<b>5</b>
5.3.1	Develop, promote and disseminate guidelines and advice on practices and measures to prevent, minimise or reduce the adverse effects from the discharge of contaminants to air from the following discharge sources: .....	5
5.3.2	Provide information to the public about air quality management in the Gisborne region and types of discharges to air to improve knowledge and understanding, including: .....	6
<b>5.4</b>	<b>Liaison .....</b>	<b>7</b>
	Industry and organisations .....	7
5.4.1	Liaison with organisations, landuser groups and industry with respect to:.....	7
	Local Government .....	7
5.4.2	Liaison with relevant individuals and organisations within local government to integrate air quality management with other functions undertaken by the Gisborne district council and with adjoining local authorities carrying out functions such as landuse planning, roading, powers under other legislation and air quality management in adjoining regions as outlined below. ....	7
	Tangata whenua .....	9
5.4.3	Promote and encourage regular liaison between tangata whenua and council in relation to appropriate facets of air quality management. This could include liaison relating to: .....	9
<b>5.5</b>	<b>National Initiatives .....</b>	<b>10</b>
5.5.1	To advocate and implement, where appropriate, national government initiatives that improve information and guidance on air quality management in the Gisborne region as appropriate, including: .....	10
<b>5.6</b>	<b>Regulation .....</b>	<b>11</b>
5.6.1	Rules within the plan to avoid, remedy or mitigate the adverse effects from the discharge of contaminants to air.....	11
<hr/>		
<b>6.0</b>	<b>AIR QUALITY MANAGEMENT RULES .....</b>	<b>1</b>
<b>6.1</b>	<b>Introduction .....</b>	<b>1</b>
<b>6.2</b>	<b>Users' Guide .....</b>	<b>1</b>
6.2.1	Index to rules.....	2
6.2.2	Do i need a resource consent? .....	3
6.2.3	Noxious, dangerous, offensive and objectionable effects.....	3
<b>6.3</b>	<b>Rules for Discharges to Air .....</b>	<b>5</b>
6.3.1	General standards.....	5
6.3.2	Permitted activities .....	6
	Rule 1 Minor discharges of contaminants to air.....	6
	Rule 2 Discharges from small scale fuel burning equipment .....	7
	Rule 3 Discharges from medium scale fuel burning equipment.....	7
	Rule 4 Discharge from small scale burning in an incinerator.....	8
	Rule 5 Discharge from medium scale waste incineration.....	9

Rule 6	Discharges from small scale open burning of vegetation .....	9
Rule 7	Discharges from large scale open burning of vegetation .....	10
Rule 8	Discharges from open burning of dead animals .....	11
Rule 9	Discharges from quarrying and mineral extraction processes .....	11
Rule 10	Discharges from moveable aggregate crushing and screening plants .....	11
Rule 11	Discharges from wet abrasive blasting .....	12
Rule 12	Discharges from dry abrasive blasting - permanent facilities .....	12
Rule 13	Discharges from small scale application of agrichemicals .....	13
Rule 14	Discharges from widespread application of agrichemicals .....	13
Rule 15	Discharge of water vapour .....	17
Rule 16	Discharge from ventilation or vapour displacement .....	18
Rule 17	Discharges of heat .....	18
Rule 18	Coating processes .....	18
Rule 19	Discharge of contaminants into air from domestic and farm wastes .....	19
Rule 20	Discharge of contaminants into air from the storage or transfer of wastes on industrial or trade premises .....	19
Rule 21	Discharges from the application, storage and handling of fertilisers .....	19
Rule 22	Discharge of contaminants from vehicle engine emissions .....	19
6.3.3	Discretionary activities .....	20
Rule 23	Discharges from combustion of specified materials .....	20
Rule 25	Discharges from dry abrasive blasting – mobile facilities .....	20
Rule 26	Discharges from miscellaneous industrial or trade premises .....	20
Rule 27	Discharge of any other contaminant to air .....	21
6.3.4	Prohibited activities .....	21
Rule 28	Application of deregistered agrichemicals and 2,4-d butyl ester .....	21

## **7.0 ANTICIPATED ENVIRONMENTAL RESULTS ..... 1**

---

## **8.0 MATTERS RELATING TO RESOURCE CONSENTS ..... 1**

### **8.1 Making an application..... 1**

### **8.2 Information Required with Resource Consent Applications..... 1**

8.2.1 Description of proposal..... 1

8.2.2 Nature of discharge ..... 1 |

8.2.3 Surrounding environment ..... 2 |

8.2.4 Mitigation methods ..... 2 |

8.2.5 Monitoring ..... 2 |

8.2.6 Assessment of actual or potential effects on the environment ..... 3 |

8.2.7 Best practicable option ..... 3 |

8.2.8 Modelling requirements ..... 3 |

### **8.3 Request for Further Information ..... 4**

---

<b>9.0 CROSS BOUNDARY ISSUES .....</b>	<b>1</b>
<b>9.1 Introduction .....</b>	<b>1</b>
<b>9.2 Management Roles and Responsibilities .....</b>	<b>1</b>
<b>9.3 Procedures for Addressing Cross Boundary Issues .....</b>	<b>1</b>
<hr/>	
<b>10.0 MONITORING AND REVIEW .....</b>	<b>1</b>
<b>10.1 Introduction .....</b>	<b>1</b>
<b>10.2 State of the Environment Monitoring.....</b>	<b>1</b>
10.2.1 Air quality indicators and guidelines .....	2
<b>10.3 Compliance Monitoring.....</b>	<b>4</b>
<b>10.4 Review of the Plan .....</b>	<b>4</b>
