request that you issue a BUILDING CONSENT for the building work	k described in this application		
Date:		Please complete details continued over leaf	

Specification and building code compliance								
1.	Make and model of heater/burner:							
	Is the heater/burner?							
3.	Is the heater/burner? New Second-hand (complete item 8) Previously earthquake damaged							
4.	Type of fuel: (e.g. wood, coal, pellets)							
	Estimated value of work (GST inclusive) \$ [include value of heater, installation & wetback (if applicable)]							
6.	The appliance has been tested to standard NZS2918:2001 or other [please specify]							
7.	All heaters/burners							
	Ministry for Environment (MFE) requirements state that any heater/burner installed on any property smaller than 2ha must be a clean burning model. A clean burning model must not emit more than 1.5 grams of particulate matter for every 1kg of fuel used and have an efficiency standard of at least 65%.							
	Please supply ECan or Nelson Authorisation number							
Q	 □ Appliance complies □ Exempt from MFE clean air requirement. Second-hand heaters/burners – additional requirement 							
0.	Appliance Certification Report – second-hand heaters/burners must be inspected and tested by a suitably qualified/or approved fire installer (check with Council Building Consent Authority to find who these people are). Second hand certificate from certified plumber or other approved person attached.							
9.	Is there a wetback connection? Yes No [if no, go to question 10]							
	 a. If yes, is the wetback New or Existing b. If new, please provide a piping and connection diagram. c. Where the appliance is to be connected to a wet-back the plans supplied with the application clearly show: Open external vent / frost protection. Location of hot water cylinder (HWC) in relation to appliance i.e. elevation of HWC. Type of tempering valve and HWC type. 							
Hea								
10.	Hearth construction and thickness:							
	Distance hearth projects from heat: front sides							
	Distance to wall:							
	a) if heating appliance is on an angle – distance of back corners from walls:							
	or b) if heating appliance is parallel to the wall – distance from back:							
13.	State method of wall protection, if required: (heat resistant materials, eg brick with 25mm air gap)							
	Fixing to hearth (not less than 8mm diameter bolts)							
Flu								
15.	Does flue pass: Vertically through ceiling? □ *Yes □ No							
	Horizontally through wall?							
	Vertically through floor?							
16.	If horizontally, state method of wall protection:							
	Type of flue kit: Single shield Double shield Other							
	Distance from outer shield to framing timbers:							
	Flashing type:							
	Restricted Building Work							
	I the building work include any restricted building work?							
If Y [if t	es, provide the following details of all licensed building practitioners (LBP) who will be involved in carrying out or supervising the restricted building work: nese details are unknown at the time of the application, they must be supplied before the work begins] me Licensing class Licensed building practitioner number [or registration number if treated as being licensed under section 291 of the Building Act 2004]							
	Note: continue on another page if necessar							

Personnel who will carry out the work [in addition to any LBP's listed above]
